

Advanced Engineering

Consultancy Services

Hydraulic and Electric Actuation Development

Expertise in hydraulic system design and development.

Bespoke Vocis hydraulic development rig.

Novel electric actuation for gears and clutches

Control hardware suitable for hydraulic and electrically actuated systems

Prototype Vehicle Preparation

Expertise for preparing demonstrator vehicles with conventional and hybrid or electric powertrain vehicles.

Prototype machining

Secure workshop facilities with direct access to test track

Small Volume Assembly and Production

Specification, design and development, build and test of transmission and driveline systems

Dedicated clean transmission build area

Low volume production supply, backed by accredited ISO9001 quality procedures

Vehicle Testing

In-vehicle development of software applications with direct access to MIRA proving ground

inspire • innovate • drive
